STORAGE SOLUTIONS TO OPTIMISE SPACE UTILISATION

Statement from the customer

“The LS600 is a very striking looking system and has enabled us to achieve a cost efficient solution through the full utilisation of storage volume. With the aid and expertise from Spima, the local distributor of SSI Schaefer, we managed to design and achieve optimum system configuration to meet our goals of low storage and retrieval costs.”

Panayiotis Voskos from Bank of Cyprus

Project objectives

- ▶ Maximise storage capacity for archives
- ▶ Optimise space utilisation in warehouse
- ▶ Maximise entire warehouse volume for the bank’s archives while allowing easy access to all boxes at all times

Scope of supply and services

- ▶ Multi-tier LS600 Shelving System, with total of 951 shelf locations

Bank of Cyprus

Founded in 1899, the Bank of Cyprus Group is one of the top leaders in the Banking and Financial Services groups in Cyprus. The Group provides a vast diversity of financial products and services which include retail and commercial banking, finance, factoring, investment banking, brokerage, fund management, private banking, life and general insurance etc.

Project

SSI Schaefer was assigned to provide a modern storage solution in order to utilise warehouse volume to its greatest extent. Only half of the warehouse area was considered in this phase of the project, and the task at hand was to replace the existing static bolt shelving.

After a detailed analysis of the client's requirements and premises, SSI Schaefer's distributor, Spima, suggested installing a multi-tier LS600 Shelving System, in order to allow a boost in storage capacity, ease of storage and retrieval, as well as the ability for future expansion.

The SSI Schaefer multi-tier LS600 Shelving is a sturdy and very cost-effective system built to FEM standards. Not only did the specially designed mesh decking panels facilitate the ease of sliding archives boxes in and out of the shelves, it also allows for the sprinkler system to be installed should the need arise.

The bank is currently in the process of installing phase 2 – the extension of this project for the utilisation of the second half of the room volume. The handover of this phase is scheduled for completion at the end of June 2013.

In a nutshell

Working with SSI Schaefer has helped Bank of Cyprus successfully maximise storage space and achieve optimum utilisation of warehouse space. This was coupled along with a remarkable improvement in storage and retrieval activities. In addition, the ability for future expansion has been made possible thanks to the versatility of the LS600 Long-span Shelving System which allows shelf adjustability.
