Chapter A

SSI SCHÄFER

Containers from SSI SCHAEFER provide endless diversity

SSI SCHAEFER's impressive range of warehouse, order picking and transport containers includes more than 2,000 different types, designs and sizes.

All product developments within our portfolio draws on experience gained from innumerable practical applications. You can rely on these products because development based on real

usage under demanding conditions is better than any simulated tests. You can be sure that the design and material quality of every type lives up to our promises.

Benefit from SSI SCHAEFER's expertise because we understand storage.

General note regarding dimensions in this catalog chapter:

all SSI SCHAEFER plastic containers are manufactured to **within the plastic shaped parts tolerance specified by DIN 16 742.**

Semi-open front storage containers – the practical solution

SSI SCHAEFER's containers are designed to integrate perfectly into variety of different rack systems. Thanks to their coordinated dimensions, they can be specifically combined to fit the individual rack fields independently of their purpose.

SSI SCHAEFER's containers create the perfect storage system regardless of whether they are used in high bay racking systems, single or multi-tier platform systems or fully automated small parts storage.

Stackable transport containers for specific warehousing applications

The 14/6 range stackable transport containers are made of plastic and are ideal for both intra-company transport and shipping. They also perfectly fit all SSI SCHAEFER rack systems.

The diverse range of different sizes makes this range of containers highly adaptable to the customer's specific warehousing applications.

The plastic 14/6 range is both compatible and stackable with the 14/6 steel containers along with the 14/7 range made of steel and the plastic LF series.

The fully closed walls allow the boxes to be completely filled. In addition, the sturdy stacking rim and the flat base ensure the safest possible stacking for both intra-company and external transport.

The stacking ratio

- **Polypropylene**
resistant to most oils, acidic and alkaline solutions, sound insulation effect when used on conveying sections, when used properly dimensionally stable from -20° to +100°C
- **Keeps its shape and robust**
- **Smooth interior walls**
for easy cleaning
- **Recessed handle on the short sides**
for safe manual transport
- **Stackable**
with LF range made of plastic, 14/7 series made of steel, 14/6 range made of steel

ELB range – the all-round container for every application

ELB Euro light container

SSI SCHAEFER has created an innovative high-tech product, drawing on expertise gained from unique, special applications. The result is an incredibly light, robust and, above all, low-cost general purpose container, which is differentiated by its versatility.

Developed using a new material in a new machine, the Euro light container is a high quality product suitable for a vast range of applications.

Smooth standard base for manual handling or modular shelving systems (max. content weight 20 kg)

ELB Euro light container – standard design

MF range – the professional solution for automated warehousing and production

MF multi-functional container range

The MF multi-functional container range is the ideal solution for all automated warehousing. They are perfect for production tasks or during reusable packaging for external goods transport. The series also features a double base for optimum conveying with high loads, comb-shaped ribs for perfect contact with all conveying sections and the open-rib tunnel underneath the running edge to prevent scooped areas.

Standard base for problem-free and safe storage using ASPW systems (max. content load 30 kg)

Long holes for the lid hinges
Handles for manual handling
Document holder with integrated barcode field

Fitting for optical identification points
Upper stacking rim
Layer identification point

LTB range – light and strong for transport and storage

LTB containers for warehousing and transportation

The LTB from SSI SCHAEFER provides especially high volume usage, reinforced top and bottom edges together with four sturdy corner supports.

Specially designed base variants guarantee that it can move along conveying sections without any difficulty. These characteristics ensure high torsion resistance and safe stacking. Its very low empty weight together with the reinforced standard base make it suitable for content weighing up to 50 kg. The variant with vibration-welded base (VS01) is suitable for content weighing up to 70 kg.

In addition to the open standard variant, the LTB is also available with single or piece hinged lid or a separate lid. When using these separate lid or the hinged lid, the LTB can be shipped and remains suitable for automated stacking and safe storage using ASPW systems or modular shelvings.

The LTB containers for warehousing and transportation from SSI SCHAEFER could be incremental in creating consistently automated material flow.

LTF range – containers for automated warehousing

LTF range containers

The various base designs of the storage and transport fix range containers (LTF) enable content loads of up to 70 kg depending on the specific version.

Vertical sidewalls ensure that the internal dimensions are optimally usable. With their special corner frame design, they are capable of handling high stacking loads and are also easy to clean.

The containers also feature VDA label slots, adhesive surfaces for barcodes, vertical lifting slots and holes for alignment as well as transponder retaining elements. Further options also include drainage holes in the base as per the VDS directive for the HHS 3 classification and diverse handle versions.

The LTF is compatible with VDA system elements (e.g. A 1208, see KLT).

Long hole for lid hinge, compatible with the MF range

Lid sealing holes, compatible with the MF range

Lifting slots for vertical retrieval, compatible with the MF range

Double-walled corner frame for high stacking loads

Retaining element for label securing wire (short/long sides)

Retaining option for check card transponder (short/long sides)

Sturdy structure for pulling equipment (short/long sides), rounded corners, advantageous for conveying sections

Large adhesive or hot stamping surfaces

Holes for alignment

Label holder with integrated barcode adhesive strip (short/long sides)

Standard base (max. content load 30 kg)

Insert boxes – to control the chaos

Without insert boxes the storage areas and workshops in many companies descend into unending chaos. They are the ideal solution for organizing and safely storing numerous small parts. SSI SCHAEFER's insert boxes more than just a means of creating order in boxes, drawers and containers. They are also essential for making the very best use of the space available in carriers and containers.

Furthermore, these flexible insert boxes are also incredibly rugged. Available in innumerable designs, they are resistant to most oils, acidic and alkaline solutions while their smooth inner walls also make them easy to clean. They eliminate the need to search for items as everything is where it is supposed to be.

QX range – Quality plus X

QX range

When developing the QX family, SSI SCHAEFER's engineers moved away from the traditional container design with numerous ribs. We have succeeded in combining the best elements of recent product developments to create a state-of-the-art container.

Hollow-wall technology is used to make the container exceptionally sturdy. The variant with a vibration-welded base (VS) is capable of handling content loads of up to 70 kg. Naturally, the container is also suitable for conveyor systems and automatic handling systems.

Optionally, the QX can be produced with notches for fixing of vacuum-formed inserts or other component fittings. Standard containers have smooth inner walls. This is an advantage for on-board networks because nothing can jam. The smooth inner walls are also easy to keep clean.

However, the absolute highlight of this product is the innovative stacking rim. It is designed to completely prevent coarse dust and spray water (as per class IP 44) from entering the container.

QX container – base dimensions 600 x 500 mm

ECOftech folding boxes for industrial applications

SSI SCHAEFER developed the ECOftech folding box with and without access openings for industrial applications. Equipped with an active locking mechanism and ergonomically shaped handles, this folding box generation can be followed up quickly and safely without any fixed order, which reduces volume by approximately 80%.

ECOftech is designed for all ASPW applications and conveyor systems and is also suitable for full automation. With a content load of 20 kg and a usable internal volume of 55 liters, the folding box has numerous applications for the industrial, commercial and service sectors.

The container variant with two-sided access opening and sliding mechanism enables especially rapid and safe access to the products. The large access opening on the short sides not only increases order picking performance but also enables articles to be removed easily when the container is stacked.

The ECOftech ECT folding box bears the "Product of the Year 2011" seal of quality. The innovative containers prevailed over the competition, taking first place in the storage and transport systems category in the best plastic product competition organized by the Pro-K association.

FK – the foldable and collapsible containers for warehousing and transportation

The demanding standards of the current packaging regulations require reusable transport containers. These containers are essential to the prevention of packaging waste. Depending on the type of box, folding reduces the container volume by approx. 80% for empty return transport.

All of the folding plastic containers from SSI SCHAEFER are designed

for euro pallet dimensions. The FK containers are distinguished by their large, rigid upper lip. The boxes are very torsion-resistant, which ensures safe stacking, especially when used without a lid.

The collapsible design can be used only with a lid and represents a cost-effective alternative to the folding design when shipping light goods.

BLUE **GRAY**

Additional colors available on request

- ▶ **Polypropylene**
resistant to most oils, acidic and alkaline solutions, sound insulation effect when used on conveying sections, when used properly dimensionally stable from -20° to +100°C
- ▶ **Nominal sizes:**
600 x 400 mm / 800 x 600 mm
- ▶ **Keeps its shape and robust**
- ▶ **Good handling**
thanks to ergonomic handle variants
- ▶ **Hinged, divided lid**
secured with seal
- ▶ **With base ripping**
also suitable for APSW systems
- ▶ **Volume reduced by approx. 80%**

Nesting storage and transport – saves space when empty

Nesting storage and transport containers offer economic solutions and diverse applications for reusable transport logistics and order picking.

The three basic options for reducing the volume of containers with rigid outer walls are:

- ▶ Tapered containers with bail arms – stackable either in or on top of each other using 180° lockable bail arms (see KMB with bail arms).
- ▶ Stack and nest containers can be stacked with and without a lid. If they are empty they can be stacked inside each other by rotating them 180°.
- ▶ Tapered containers can only be stacked on top of each other with a lid. When empty, they can be stacked inside each other without a lid.

BLUE

Additional colors available on request

- ▶ **Polypropylene**
resistant to most acids and alkalis, when used correctly, retains its stability at temperatures between -20° and +90° Celsius, the base material is suitable for use with foodstuffs
- ▶ **Space gain**
75% space gain when empty
- ▶ **Automatic unstacking possible**
from sides and front
- ▶ **Ergonomic**
thanks to comfortably designed hand grips
- ▶ **Easy cleaning**
thanks to smooth surfaces and optional placed water drainage holes
- ▶ **Low noise**
when used on conveying sections
- ▶ **Good grip**
on belt conveyors due to rough base
- ▶ **Barcode areas**
protected against damage and dust due to special arrangement

Sheet steel boxes and containers

SSI SCHAEFER's sheet steel boxes and containers combine sturdiness, quality and economy. The extremely robust container systems are highly resistant to mechanical loads.

As a consequence, heavy goods such as solid materials, cast or forged parts can be transported, stored and picked safely and efficiently.

Whether for production preparation, the warehouse, shipping companies, order-picking or transport, sheet steel boxes and sheet steel containers can always fulfill the most demanding standards.

SHEET STEEL SHEET STEEL

Sheet steel shelf containers

- Designed for SSI SCHAEFER modular shelvings
- Extensive range of order accessories
labeling and partition options (advantageous for both large and small warehouses)

* Surface quality: galvanized acc. to DIN EN ISO 1461

Plastic shelf containers

from page A10

RK 301 Steel, painted blue

can be divided into max. 10 compartments, 6 containers per shelf.

Item	Description (W x D x H mm)	PU	Order No.
RK 301	Shelf container (162 x 317 x 100/137)	1 pc.	11550
RKE 386	Labels for short side	100 pcs.	11190
RKF 386	Protective film	100 pcs.	11920
RKT 335/301	Divider, galvanized	1 pc.	11150

RK 2386 Steel, galvanized

can be divided into max. 12 compartments, 7 containers per shelf.

Item	Description (W x D x H mm)	PU	Order No.
RK 2386	Shelf container (136 x 393 x 100/107)	1 pc.	18240
RKE 2386	Labels for short side	100 pcs.	11560
RKF 2386	Protective film	100 pcs.	11570
RKT 2386	Divider, galvanized	1 pc.	18250

RK 4386 Steel, painted blue

can be divided into max. 12 compartments, 6 containers per shelf.

Item	Description (W x D x H mm)	PU	Order No.
RK 4386	Shelf container (162 x 398 x 120/137)	1 pc.	18000
RKE 386	Labels for short side	100 pcs.	11190
RKF 386	Protective film	100 pcs.	11920
RKT 386/512/4386	Divider, galvanized	1 pc.	11180

RK 386 Steel, painted blue

can be divided into max. 12 compartments, 6 containers per shelf.

Item	Description (W x D x H mm)	PU	Order No.
RK 386	Shelf container (162 x 404 x 120/137)	1 pc.	11170
RKE 386	Labels for short side	100 pcs.	11190
RKF 386	Protective film	100 pcs.	11920
RKT 386/512/4386	Divider, galvanized	1 pc.	11180

RK 512 Steel, painted blue

can be divided into max. 16 compartments, 6 containers per shelf.

Item	Description (W x D x H mm)	PU	Order No.
RK 512	Shelf container (162 x 504 x 120/137)	1 pc.	16210
RKE 386	Labels for short side	100 pcs.	11190
RKF 386	Protective film	100 pcs.	11920
RKT 386/512/4386	Divider, galvanized	1 pc.	11180

Order No. = on stock

- ▶ **Sheet steel**
for storage and transport of heavy goods, e.g. solid materials, cast and forged parts
- ▶ **High load capacity**
due to right-angled profile and strongly compressed walls
- ▶ **Strong base**
- ▶ **Safe stacking**
as a result of reinforced feet and solid support and stacking corners

* Surface quality: galvanized acc. to DIN EN ISO 1461

Transport and stackable containers

E transport and stacking containers

Transport and stacking containers with solid walls or with flap. Strongly compressed walls with a right-angled profile guarantee high capacity with low empty weight. Extra reinforced feet together with solid catch and stacking corners ensure reliable stacking.

Base version: painted or galvanized, with base ribbing

Ground clearance: 105 mm

* With flap, ** Solid walls

S transport and stacking containers

Transport and stacking containers for all heavy goods, solid material, cast and forged parts. The side walls have a tube-shaped profile at the top and reinforcing beads. In addition, the containers also feature continuous ribbing around the sides, a strong base, sturdy feet and especially strong stacking corners with crane lugs.

Ground clearance: 100 mm*

Lager-Fix containers, post pallets and flat steel pallets

Lager-Fix container

These containers utilize the principles and design of the proven Lager-Fix semi-open front storage container. The large viewing and access opening is especially advantageous and remains accessible even when the container is stacked. That is why this container is also utilized for the staging of the material on the production line.

The stacking rim runs around three sides and enables safe stacking of up to 4 units on top of each other. Mixed stacks of different sizes are possible. The right-angled profile and the strongly compressed walls guarantee high load capacity.

Ground clearance 105 mm.
Height of hopper front 430 mm.

Item	Nominal dimensions L x W x H (mm)	External dimensions L x W x H (mm)	Width of fork opening L x W (mm)	Load (kg)	Stacking factor	Order No.	Item	Order No.
14/7-0-a-I	700/490 x 800 x 610	710 x 820 x 610	290 x 720	800	1 + 3	8790	14/7-0-a-v	8800

Post pallets

Clear storage and easy transportation of production and assembly parts with large dimensions that exceed the limited container volume. Stand made of square tube 50 x 50 x 3 mm with welded stacking corners.

Ground clearance 100 mm.

Base reinforced with strong ribbing.

Item	Nominal dimensions L x W x H (mm)	External dimensions L x W x H (mm)	Width of fork opening L x W (mm)	Load (kg)	Stacking factor	Order No.	Item	Order No.
